

GRASS-CUTTING HEAD WITH RELOADING OF THE LINE WITHOUT  
REMOVAL OF THE SPOOL

ABSTRACT

A grass-cutting head (1) comprising: a housing (3); and at least one spool (5) placed in said housing and on which a cutting line (F) can be wound. The spool is accessible from the outside to enable a supply of cutting line to be wound onto it without taking said spool out of said housing, means (13B) being provided to hold the spool in said housing while said supply of cutting line is being wound onto it. (Fig. 1)
